F.A.S.T: A 2009 program

For 2009, the entire distributor network of the TBM 850 has developed an exclusive program called **F.A.S.T** to help you lower your TBM costs. Whether you want to share ownership or lease your aircraft occasionally, **F.A.S.T** gives you a whole new slate of solutions.

The TBM850, the finest personal airplane in the world

The TBM 850 is the fastest, highest-flying aircraft in its class. In production for 20 years, with 500 airplanes in service, the TBM is designed and built to commercial airliner standards, with the closest tolerances of any plane in general aviation. The TBM 850 gives you outstanding payload, range and speed. It is powered by one of the most reliable engines in the world, the Pratt & Whitney Canada PT-6, which has logged some 330 million flight-hours to date on more than 100 different aircraft types. All TBM 850 are equipped with the most advanced and pilot-friendly avionics system, the GARMIN G1000.

TBM850 

The F.A.S.T Co-Ownership Program Concept

The program is ideally suited for 2 shareholders, on a 1/3 and 2/3 basis, per airplane in a four year program agreement, but could accommodate up to 3 shareholders.

Shareholders receive a minimum of 100 days exclusive use per year with unlimited flight hours as opposed to traditional fractional programs that require the purchase of annual flight hours that are either used or lost.

With the F.A.S.T program, shareholders are ensured that all maintenance work on the airplane is performed in a factory approved and FAA certified repair station, and the program allows for professional management ensuring the highest value retention of the airplane through maintenance scheduling and tracking, as well as other administrative duties.

Through online scheduling software, shareholders can access their airplane's flight schedule at any time.

The program also provides a structure making costs predictable for the duration of the program.

Costs

- Shareholders are responsible for their portion of the initial aircraft purchase
- Non recourse financing available with qualified minimum down payment
- A monthly program fee covers a multitude of management and administrative services
- A fee per flight hour is assessed to cover all scheduled and unscheduled maintenance items

F.A.S.T is a unique Co-Ownership program offering many benefits:

- Low cost of ownership
- Sharing of risk
- Better utilization of capital assets
- Professional management as opposed to self management
- Ability to own more plane for less money

F.A.S.T. is an exclusive program proposed by the distributors of the TBM 850 for 2009 only. This document is not contractual and figures are provided for information only. Ask your nearest distributor for details and sample agreements.
